Ferris State University is in its second century as one of the nation’s premier technical and professional universities. Ferris provides practical, “hands-on” education necessary to make its graduates immediately employable in a diverse array of fields. The institution was founded in 1884 by Woodbridge N. Ferris, a former Governor of Michigan and a U.S. Senator. His intent was to provide a practical education for any person with the motivation and potential to benefit.

Today, Ferris State continues to teach technical skills and applications focused on solving real problems, and produces a work force that is prepared to meet the world of high technology. The University offers more than 120 academic programs, designed to respond to the changing needs of manufacturing, business, health care and other industries and professions which are critical to Michigan’s economy.

With a student-to-faculty ratio of approximately 16-1, students at FSU receive the individual attention necessary to prepare them for their careers. Additionally, Ferris boasts a placement rate for graduates of 98 percent, one of the best in the Midwest.

The scenic Big Rapids campus is located along the banks of the Muskegon River in the gentle rolling hills of west central Michigan.

Initially, Ferris was known as the Ferris Industrial School, but in 1899 the title was changed to Ferris Institute. It was privately owned and operated until 1931 when it became a non-profit, non-stock education corporation. In 1949, Ferris became a state college, and the school was officially renamed Ferris State College in 1963 and Ferris State University in 1987.
